Reasons for Allowance

1. Claims 1, 5, 6 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Prior art of record, specifically, Takafuji et al (US 6,957,591) disclosed the claimed invention of the present patent application as set forth in the supplemental final rejection issued on December 2, 2008. In the supplemental final rejection on December 2, 2008, the examiner rejects claims 1, 5 and 6 under 35 USC 102(e) as being anticipated by Takafuji et al (US 6,957,591). However, as of the filing date November 10, 2003, the applicant claims the foreign priority benefit under 35 USC 119(a)-(d) from the Japanese application 2002-208596 as indicated in the Declaration submitted on July 17, 2003. A certified Copy of Foreign Priority Application was filed on the same filing date November 10, 2003. The claim for priority is timely presented in accordance with rule 37 CFR 1.55(1)(i) and 37 CFR 1.55(2). In addition, on March 30, 2009, the applicant submits a translation version of the Foreign Priority Document of Japanese application 2002-208596 to perfect the Applicants' foreign priority claim in accordance with rule 37 CFR 1.55(a)(3), (4) (i) (B) and (ii). Upon considering the translation version submitted, the examiner determines that the Japanese application 2002 - 208596 was filed by the same applicant and for the same invention as the

current application as required by rule 37CFR 1.55 (B) and (D). Therefore, under rule 37 CFR 1.55, the applicant is entitled to the foreign priority date which is July 17, 2002. Since the effective filing date of the cited prior art Takafuji (US 6,957,591) is February 14, 2003 which is antedated by the present application, Takafuji cannot be applied against claims 1, 5, and 6. The rejection of claims 1, 5, and 6 over Takafuji set forth in the supplemental final rejection issued on December 2, 2008 is herein withdrawn.

Prior art of record does not disclose an occupant determining device set forth in claims 1, 5 and 6. In the occupant determining device, the controller changes the occupant determination state to the adult determination state when the detected load value is between a first determination threshold and a second determination threshold for a first time duration. In addition, when the detected load exceeds the second determination threshold for a second time duration, the controller also changes the occupant determination state to the adult determination state. The second determination threshold is larger than the first determination threshold, and the second time duration is shorter than the first time duration. As such, when the detected load is higher than the second determination threshold, the changing of the occupant determination state to the adult determination state occurs sooner than when the detected load is lighter and is between the first and the second determination threshold.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim T. Nguyen whose telephone number is (571) 272-4441. The examiner can normally be reached on Monday-Thursday (8:30AM - 5:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on (571)272-6956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
